
A LEADING U.S.-BASED TELECOM BEHEMOTH

FROM HAND-PICKING TOP TALENT

with niche skills, building a core technical team in a week for one of the mission critical project, to creating innovative products - our strategic partnership continue to strengthen our engagement with this multibillion dollar U.S. wireless operator.

Some of Our Key Support Solutions Include:

Ticketing System

An integrated web application that collects customer support requests to seamlessly isolate customer issues and offer immediate remedial measures.

Asset and Order Management System

An asset allocation approval workflow system for hardware equipment like tower, machines, etc.

Holistic Customer View

A solution that draws information from several downstream data source systems to furnish an aggregated and holistic view of customer information.
